

SUMMARY

Information Systems graduate with a strong background in web development and creating digital media. Proven ability to build and deploy high-quality web applications, including an AI-powered defect detection system for GDG Cloud Jakarta and a custom vehicle tracking system using Laravel. Named a Top 3 Student at a WordPress Bootcamp for developing high-performance websites. Proficient in HTML, CSS, Bootstrap, Laravel, and WordPress, with a solid understanding of the full web development process. Eager to bring technical skills and structured problem-solving to a web development role.

EDUCATION

Sam Ratulangi University

2022-2026

Information Systems

GPA: 3.98/4.00 (Cum Laude)

Thesis Title: Web-Based Car Service Status Tracking (Case Study: FocusAuto Repair Shop Kalasey)

- Designed and developed a responsive car service tracking application using Laravel and Bootstrap, leveraging the Rapid Application Development (RAD) methodology to optimize the development lifecycle and deliver real-time vehicle monitoring.

EXPERIENCE

Informatics Teacher – Kampus Mengajar Program

September 2024-December 2024

SMP Negeri 2 Kalawat

- Served as a Technical Team Mentor for a Wix web development project, guiding students through layout design and structural setup in a Project-Based Learning curriculum.
- Coordinated multimedia and branding deliverables by designing over 400+ student ID cards and co-managing the official school Instagram account to increase digital engagement.

Finance Team (Internship)

January 2025-February 2025

Badan Pusat Statistik (BPS) North Sulawesi Province

- Handled critical data management through systematic file archiving and document imaging tasks, ensuring high data accuracy and structured records for regional statistics.

Admin (Part-time)

June 2025-Present

FocusAuto Repair Shop Kalasey

- Managed core business operations by generating accurate transaction invoices and maintaining the company's vendor profile on Indonesia's government procurement portal (INAPROC Website).

PROJECT & PORTFOLIO

OtoLens - #JuaraVibeCoding | [Link Portfolio](#)

- Built a fully responsive web application using Google AI Studio and Gemini to rapidly prototype a structural defect detection system for used cars.
- Integrated the Gemini 1.5 Flash API via the @google/genai SDK to power an interactive hotspot mapping system for real-time chassis scanning.
- Deployed the client-side layout on Google Cloud Run, featuring a dynamic bilingual (EN/ID) PDF report generator.

Web-Based Car Service Tracking System | [Link Portfolio](#)

- Designed and developed a web-based car service tracking application using the Laravel framework and Bootstrap.
- Focused on building a responsive and informative front-end to help users monitor vehicle service progress in real time.
- Implemented the Rapid Application Development (RAD) methodology to ensure a fast, structured, and efficient software development cycle.

Rajawali POS & Inventory | [Link Portfolio](#)

- Designed and built a native Windows desktop POS and inventory management system using NativePHP, Electron, and SQLite to streamline offline store operations for Toko Rajawali.
- Integrated comprehensive reporting modules with custom Excel and PDF export functionality to enable efficient sales and stock tracking.

TRAINING & CERTIFICATIONS

WordPress Development Bootcamp Special Skill Indonesia

April 2026-May 2026

- Completed an intensive web development program focusing on responsive professional landing pages, clean layout design, and modern digital branding.
- Awarded Top 3 Best Student for developing a high-performance portfolio website that successfully integrated advanced Elementor layouts.

Other Online Training & Certifications: Assistant Web Developer - Digital Talent Academy Komdigi (2026), #JuaraVibeCoding Participant - Google Developers Group Live Indonesia (2026), WordPress Development Bootcamp (Top 3 Best Student) - Special Skill Indonesia (2026), Intro to Software Engineering - RevoU (2026), Web Development Series 15.0 - Dibimbing (2026), Memulai Pemrograman Dengan Java - Dicoding Indonesia (2024).

SKILLS & STRENGTHS

Technical Skills: HTML & CSS, React.js, Laravel, Bootstrap, WordPress (Elementor), Wix, MySQL, GitHub, Google AI Studio, Vibe Coding, Multimedia (Video Editing, CapCut, Canva, Photography).

Soft Skill: Teamwork, Creativity, Problem Solving, Time Management, Structured Thinking, Adaptability and Fast Learner.

Language: Indonesia, English, Korean (Passive)
